**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

September 13, 2001

Sir:

Prior to examination on the merits of this application and prior to calculation
of the filing fee, please amend the above-identified application as follows:

IN THE CLAIMS:

Please cancel claims 1 - 16 without prejudice or disclaimer of the subject
matter contained therein.

Please add the following new claims to the application:

17. A radio handset for browsing the Internet comprising:

a browser application which provides a user of the handset access to the
Internet via a first transceiver which sends radio packets to and receives radio packets
from an Internet gateway;

a router arranged to route content supplied by the Internet gateway via the first
transceiver to a registered application, the content having an identifier which

identifies the type of application suitable for receiving the content and arranged to register applications by associating an application on registration with at least one identifier;

a user interface connected to the browser application having a display for displaying content and a user input; and

an interface having a radio transceiver for coupling with an interface of an accessory device comprising a remote application, the interface being arranged to receive content routed to the remote application and to thereby increase the functionality of the handset, wherein the remote application is automatically registered by the router in response to the coupling of the handset and accessory device.

18. A handset as claimed in claim 17 wherein transmission from and to the transceiver is in accordance with the WAP protocol.

19. A handset as claimed in claim 17 wherein the first transceiver and the radio transceiver are separate.

20. A handset as claimed in claim 17 wherein the radio transceiver communicates with the accessory device using low power radio frequency signals.

21. A handset as claimed in claim 20 wherein the radio transceiver transmits and receives signals according to the Bluetooth standard.

22. A handset as claimed in claim 17 wherein the router and the browser application are integrated.

23. A handset as claimed in claim 17 wherein a processor including a memory which executes the browser application.

24. A handset as claimed in claim 17 wherein the router comprises a look-up table associating application addresses with an identifier or identifiers
25. A handset as claimed in claim 24 wherein registration of an application comprises entry of the application's address and an associated identifier or identifiers in the routing table.
26. A handset as claimed in claim 17 wherein the identifier for the content comprises the content type.
27. A handset as claimed in claim 17 wherein the router de-register is registered applications by disassociating the application with an associated at least one identifier.
28. A handset as claimed in claim 27 wherein de-registration occurs in response to removal of an application from the handset and/or in response to the de-coupling of the handset and accessory device.
29. A handset as claimed in claim 17 wherein the browser application is a registered application.
30. A system comprising a radio handset for browsing the Internet and downloading content therefrom and an accessory device for increasing functionality of the radio handset in response to the content, the handset comprising:
- a browser application which provides a user of the handset access to the Internet via a first transceiver which sends radio packets to and receives radio packets from an Internet gateway;
 - a router arranged to route content supplied by the Internet gateway via the first transceiver to a registered application, the content having an identifier for identifying the type of application suitable for receiving the content and arranged to register applications by associating an application on registration with at least one identifier;

a user interface connected to the browser application having a screen for displaying content and a user input; and

an interface having a radio transceiver for coupling with an interface of an accessory device having a remote application, the interface receiving content routed to the remote application and to thereby increase the functionality of the handset; and where

the remote application is automatically registered by the router in response to the coupling of the handset and accessory device.

31. A radio handset for browsing the Internet comprising:

a browser application which allows a user of the handset to access the Internet via a first transceiver means arranged to send radio packets to and receive radio packets from an Internet gateway;

routing means arranged to route content supplied by the Internet gateway via the first transceiver means to a registered application, the content having an identifier for identifying the type of application suitable for receiving the content and arranged to register applications by associating an application on registration with at least one identifier;

a user interface connected to the browser application having a display for displaying content and user input means; and

an interface having a radio transceiver for coupling with an interface of an accessory device comprising a remote application, the interface being arranged to receive content routed to the remote application and to thereby increase the functionality of the handset, wherein the remote application is automatically

registered by the routing means in response to the coupling of the handset and accessory device.

32. A handset as claimed in claim 31 wherein transmission from and to the transceiver is in accordance with the WAP protocol.
33. A handset as claimed in claim 31 wherein the first transceiver means and the radio transceiver are separate.
34. A handset as claimed in claim 31 wherein the radio transceiver is arranged to communicate with the accessory device using low power radio frequency signals.
35. A handset as claimed in claim 34 wherein the radio transceiver transmits and receives signals according to the Bluetooth standard.
36. A handset as claimed in claim 31 wherein the routing means and the browser application are integrated.
37. A handset as claimed in claim 31 wherein a processor means including memory performs the functions of the browser application.
38. A handset as claimed in claim 31 wherein the routing means comprises a look-up table associating application addresses with an identifier or identifiers.
39. A handset as claimed in claim 38 wherein registration of an application comprises entry of the application's address and its associated identifier or identifiers in the routing table.
40. A handset as claimed in claim 31 wherein the identifier for the content comprises the content type.
41. A handset as claimed in claim 31 wherein the routing means is arranged to de-register registered applications by disassociating the application with its associated at least one identifier.

42. A handset as claimed in claim 41 wherein de-registration occurs in response to removal of an application from the handset and/or in response to the de-coupling of the handset and accessory device.

43. A handset as claimed in claim 31 wherein the browser application is a registered application.

44. A system comprising a radio handset for browsing the Internet and downloading content therefrom and an accessory device for increasing the functionality of the radio handset in response to said content, the handset comprising:

a browser application which allows a user of the handset to access the Internet via first transceiver means arranged to send radio packets to and receive radio packets from an Internet gateway;

routing means arranged to route content supplied by the Internet gateway via the first transceiver means to a registered application, the content having an identifier for identifying the type of application suitable for receiving the content and arranged to register applications by associating an application on registration with at least one identifier;

a user interface connected to the browser application having a screen for displaying content and user input means;

an interface having a radio transceiver for coupling with an interface of an accessory device having a remote application, the interface being arranged to receive content routed to the remote application and to thereby increase the functionality of the handset, and wherein

the remote application is automatically registered by the routing means in response to the coupling of the handset and accessory device.

REMARKS
